CLP Series

HOW TO ACTIVATE SCAN MODE

1. **Make sure that your CLP radio is turned on with an earpiece connected.**
   a. You should see a pulsing RED LED on your radio when you are in standby mode.
2. **Short press the MENU button (see image below) to cycle through your menu settings:**
   a. Tap the **MENU** button to cycle through the settings, listening for the voice prompt to tell you the setting that you are on.
   b. Cycle through the settings until you hear the "**Scan Mode**" prompt, this should be heard on the **3rd** press of the **MENU** button.
      i. To activate Scan Mode, tap the **+** button on the left side of the radio and your radio will activate scan mode.
      ii. Your radio will scan all channels and find an active channel (one with a conversation going on) and you can reply to that conversation.
3. **To deactivate, follow STEP 2 to cycle back to through the menu settings until you get back to the "Scan Mode" voice prompt. OR turn the radio off and then back on.**
      i. Deactivate by pressing the **+** or **−** button on the left side of the radio.
